## **BOOST your retail sales with the JAG BAG**

Increase sales to your retail customers with the environmentally friendly, re-usable bag of our Premium Organic Compost - your customer buys the first bag RRP \$20 and gets the refill cheaper RRP \$15 when they return for a refill/exchange.

### **HOW IT WORKS**

1. Buy a load of Jindalee Ag compost and receive 10 JAG BAGS free to get you started. (Normally \$3 each.)
2. Advertise the scheme to your customers
3. Count the increased sales!

Place your order now.

### **There are several reasons why plants grow well in burlap.**

Aeration: the weave of the fibres makes it easy for air to circulate unlike plastic or clay. The burlap retains moisture but at the same time let's water flow through much better than many containers. I like burlap because it's lightweight. I'm fine with the less permanent look.

### **There are several reasons why plants grow well in burlap.**

Aeration: the weave of the fibres makes it easy for air to circulate unlike plastic or clay. The burlap retains moisture but at the same time let's water flow through much better than many containers. I like burlap because it's lightweight. I'm fine with the less permanent look.

I've tested a lot of plants out using burlap sacks and here are my favourites:

**Strawberries**, they love to be mounded and aeration is important. Our strawberries look healthy when grown in sacks and produce a good crop.

**Herbs** look so natural in burlap and it makes me feel like I've created an herb garden that meshes well with its surroundings. Burlap provides a neutral colour that lets the herbs take centre stage.

**Lettuce** works well because the soil depth doesn't need to be very deep for lettuce, arugula and spinach. I do start the seeds inside or in small containers first or buy starts and transplant them into areas of the bag by cutting slits spaced apart.

### **List of all the plants I've grown in burlap and had success:**

1. **Arugula**
2. **Basil**
3. **Borage**
4. **Cabbage**
5. **Chamomile**
6. **Chives**
7. **Cilantro**
8. **Cucumbers**
9. **Lettuce**
10. **Oregano**
11. **Peppers**
12. **Parsley**
13. **Peas**
14. **Potatoes**
15. **Rosemary**
16. **Spinach**
17. **Swiss Chard**
18. **Tarragon**
19. **Thyme Tomatoes**
